Dear Ginny,

I can highly recommend Learning Harbor as an outstanding employee education system. Hematology Oncology Associates began working with Learning Harbor in 2010 and has found the system to be a great alternative to live training classes. We researched several other systems and found Learning Harbor to be not only the most appropriate for our organization but also user friendly and cost effective.

The system uses power point slides, which are easy to read and understand. The modules meet our annual requirements and we have the ability to customize modules to meet the special needs of HOA. The staff enjoy being able to complete the modules whenever time permits, 24/7. Learning Harbor makes staying in compliance easy. Reports can be run on a regular basis and monitored. Employees print their transcript and turn them in at the time of their yearly evaluation.

The Learning Harbor staff is outstanding. They respond quickly to questions and make changes and additions to the system within twenty-four hours. I would encourage an organization to consider using Learning Harbor especially if they are interested in bringing efficiencies to the education of employees and ensuring compliance within their organization.

Sincerely,

Mary Stone
