June 19, 2015

Dear Ginny,

Vascular Access Centers LLC began utilizing Learning Harbor for our staff web based compliance training since 2010 and we are very pleased with the result. Learning Harbor has proven to be an efficient and cost effective option for staff training and tracking. It is user friendly and provides us the flexibility of course selection and the option of adding additional modules. The staff appreciates the ease of use and the ability to complete the requirements when it's most convenient for them. Completing the annual course modules have become routine for our team as they now are familiar with the requirements and Learning Harbor system.

Ginny was a great help in implementing a system of posting our policy updates on Learning Harbor and creating a way to verify each team member had reviewed it. She always has our updates posted quickly which helps VAC keep its employees current. The Compliance Report is a service highlight. It really streamlines the process of tracking employee requirements and saves a great deal of time for our Clinical Compliance Department. I would recommend Learning Harbor to any healthcare providers who have staff education requirements.

Sincerely,

Patricia Reynolds
